

HTML

HTML → HyperText Markup Language

↳ above/beyond text, links to other resources
?

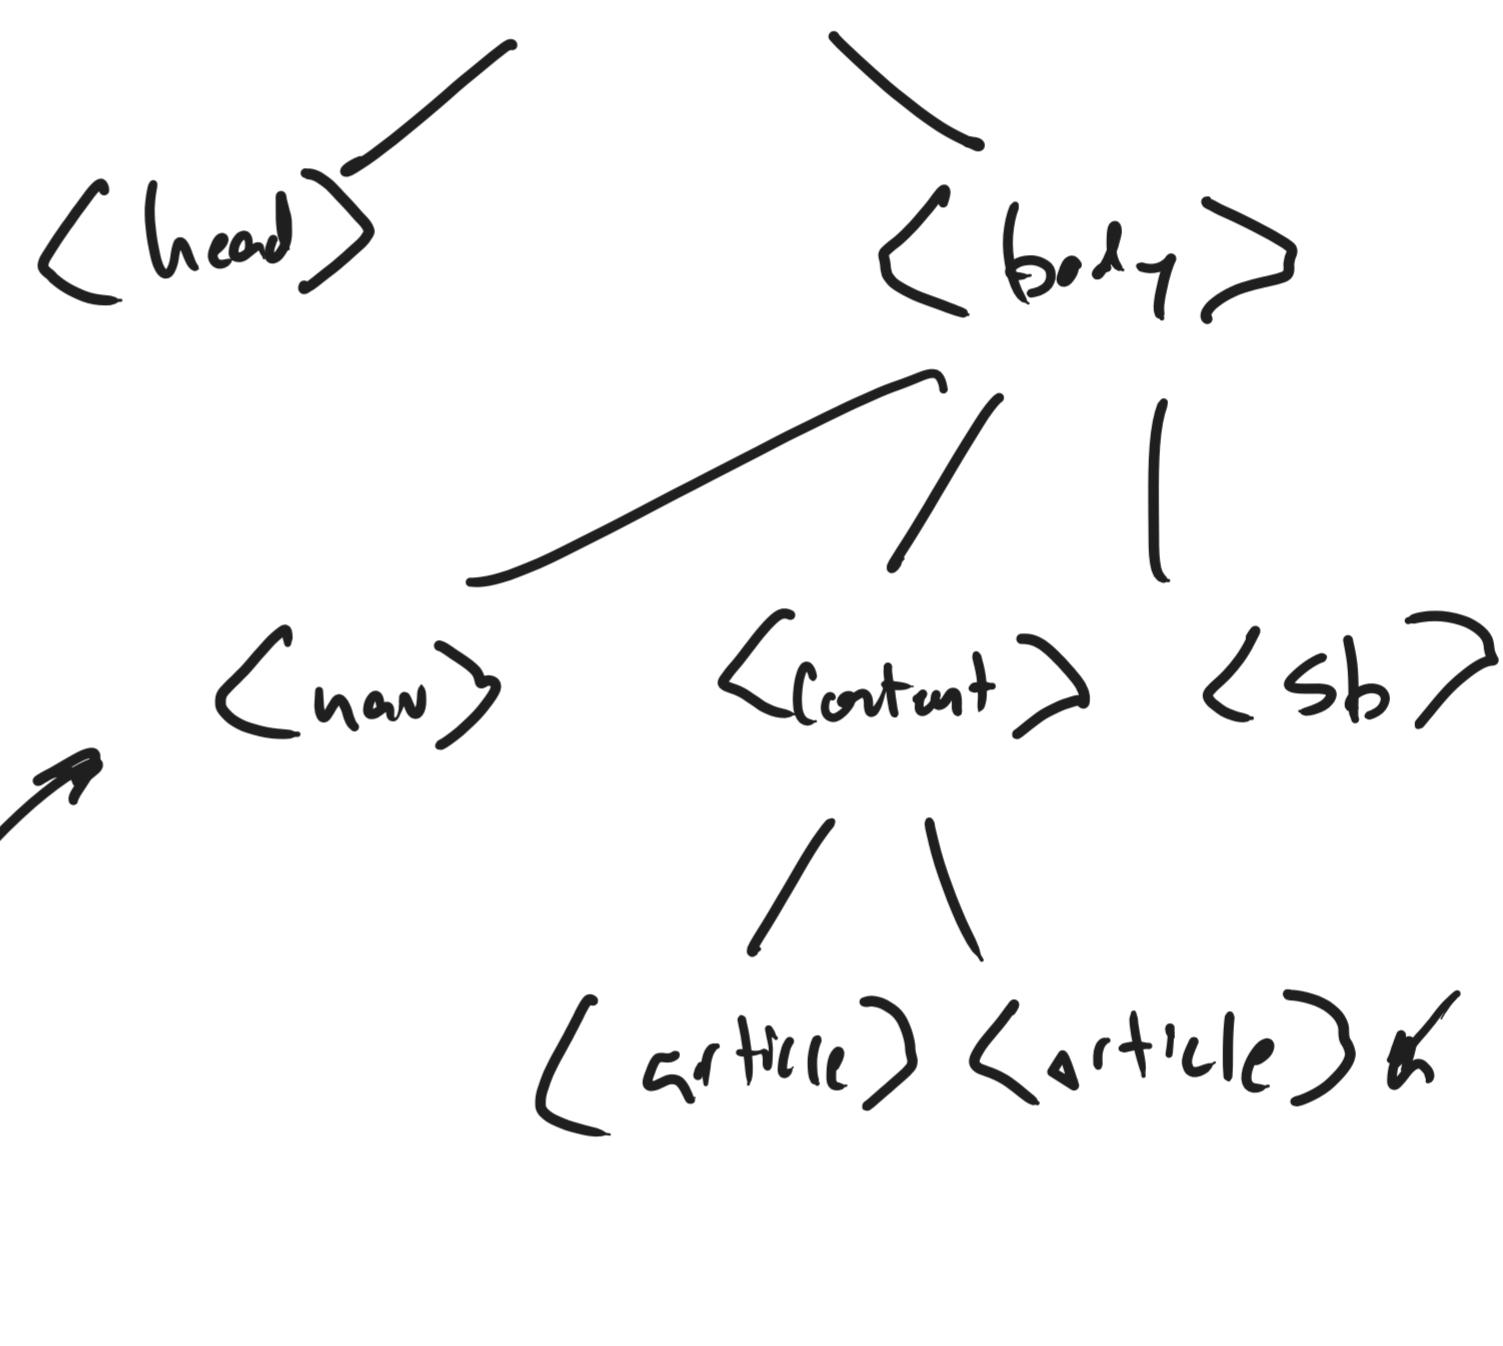

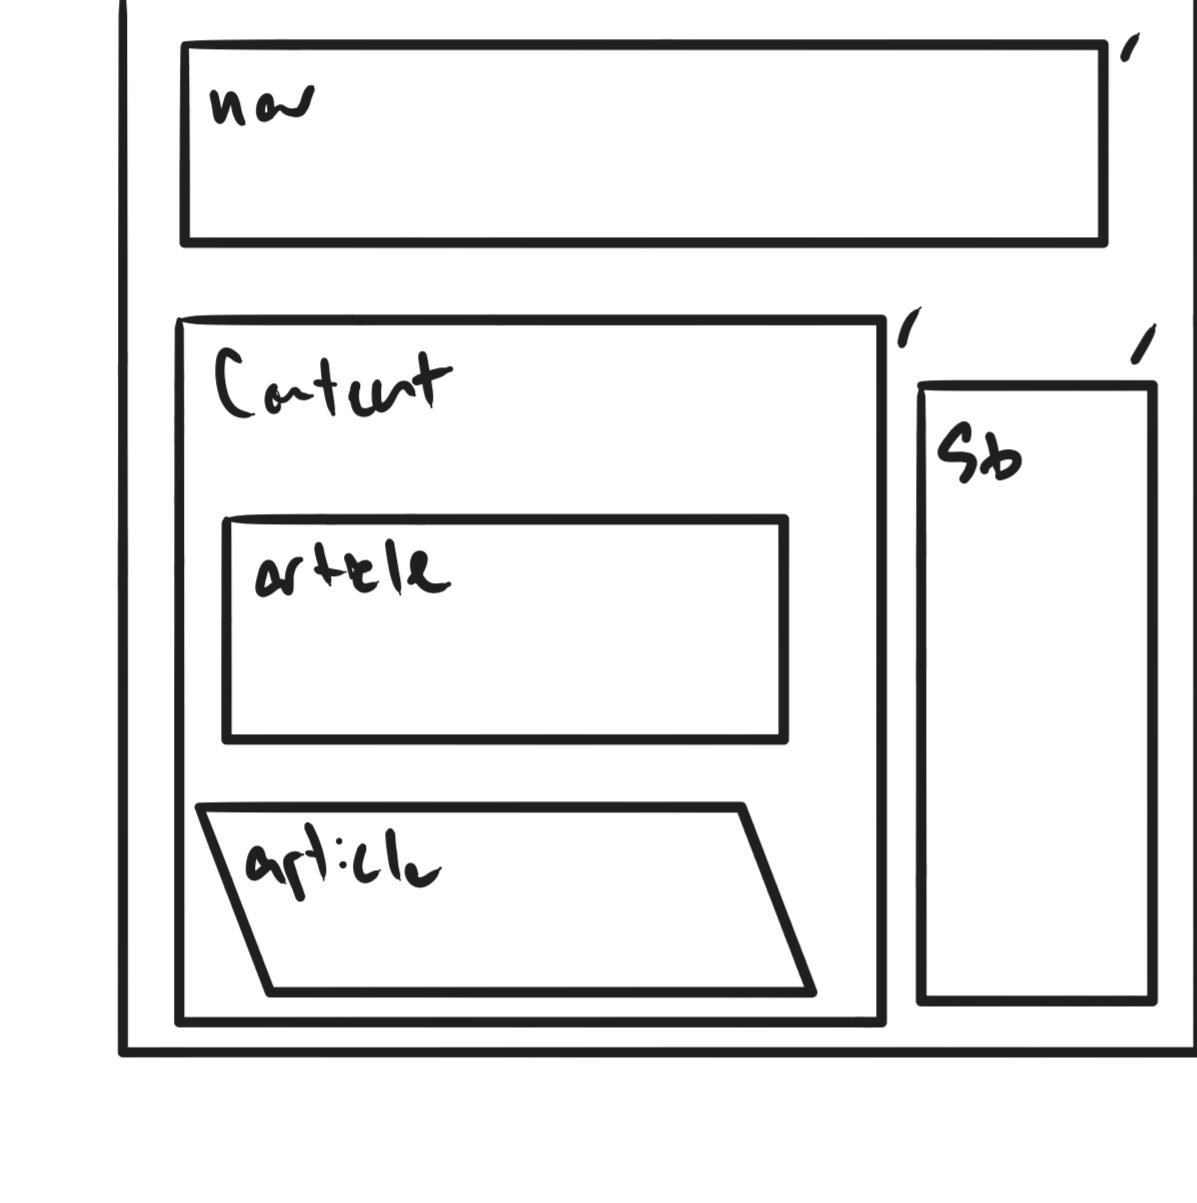

- we mark up different sections of diff. types of content (image, heading, etc.)

- HTML is Not code in the programming sense

DOM - Document Object Model

↳ the browser thinks of your HTML structure as an object tree

- it uses standard inheritance structure

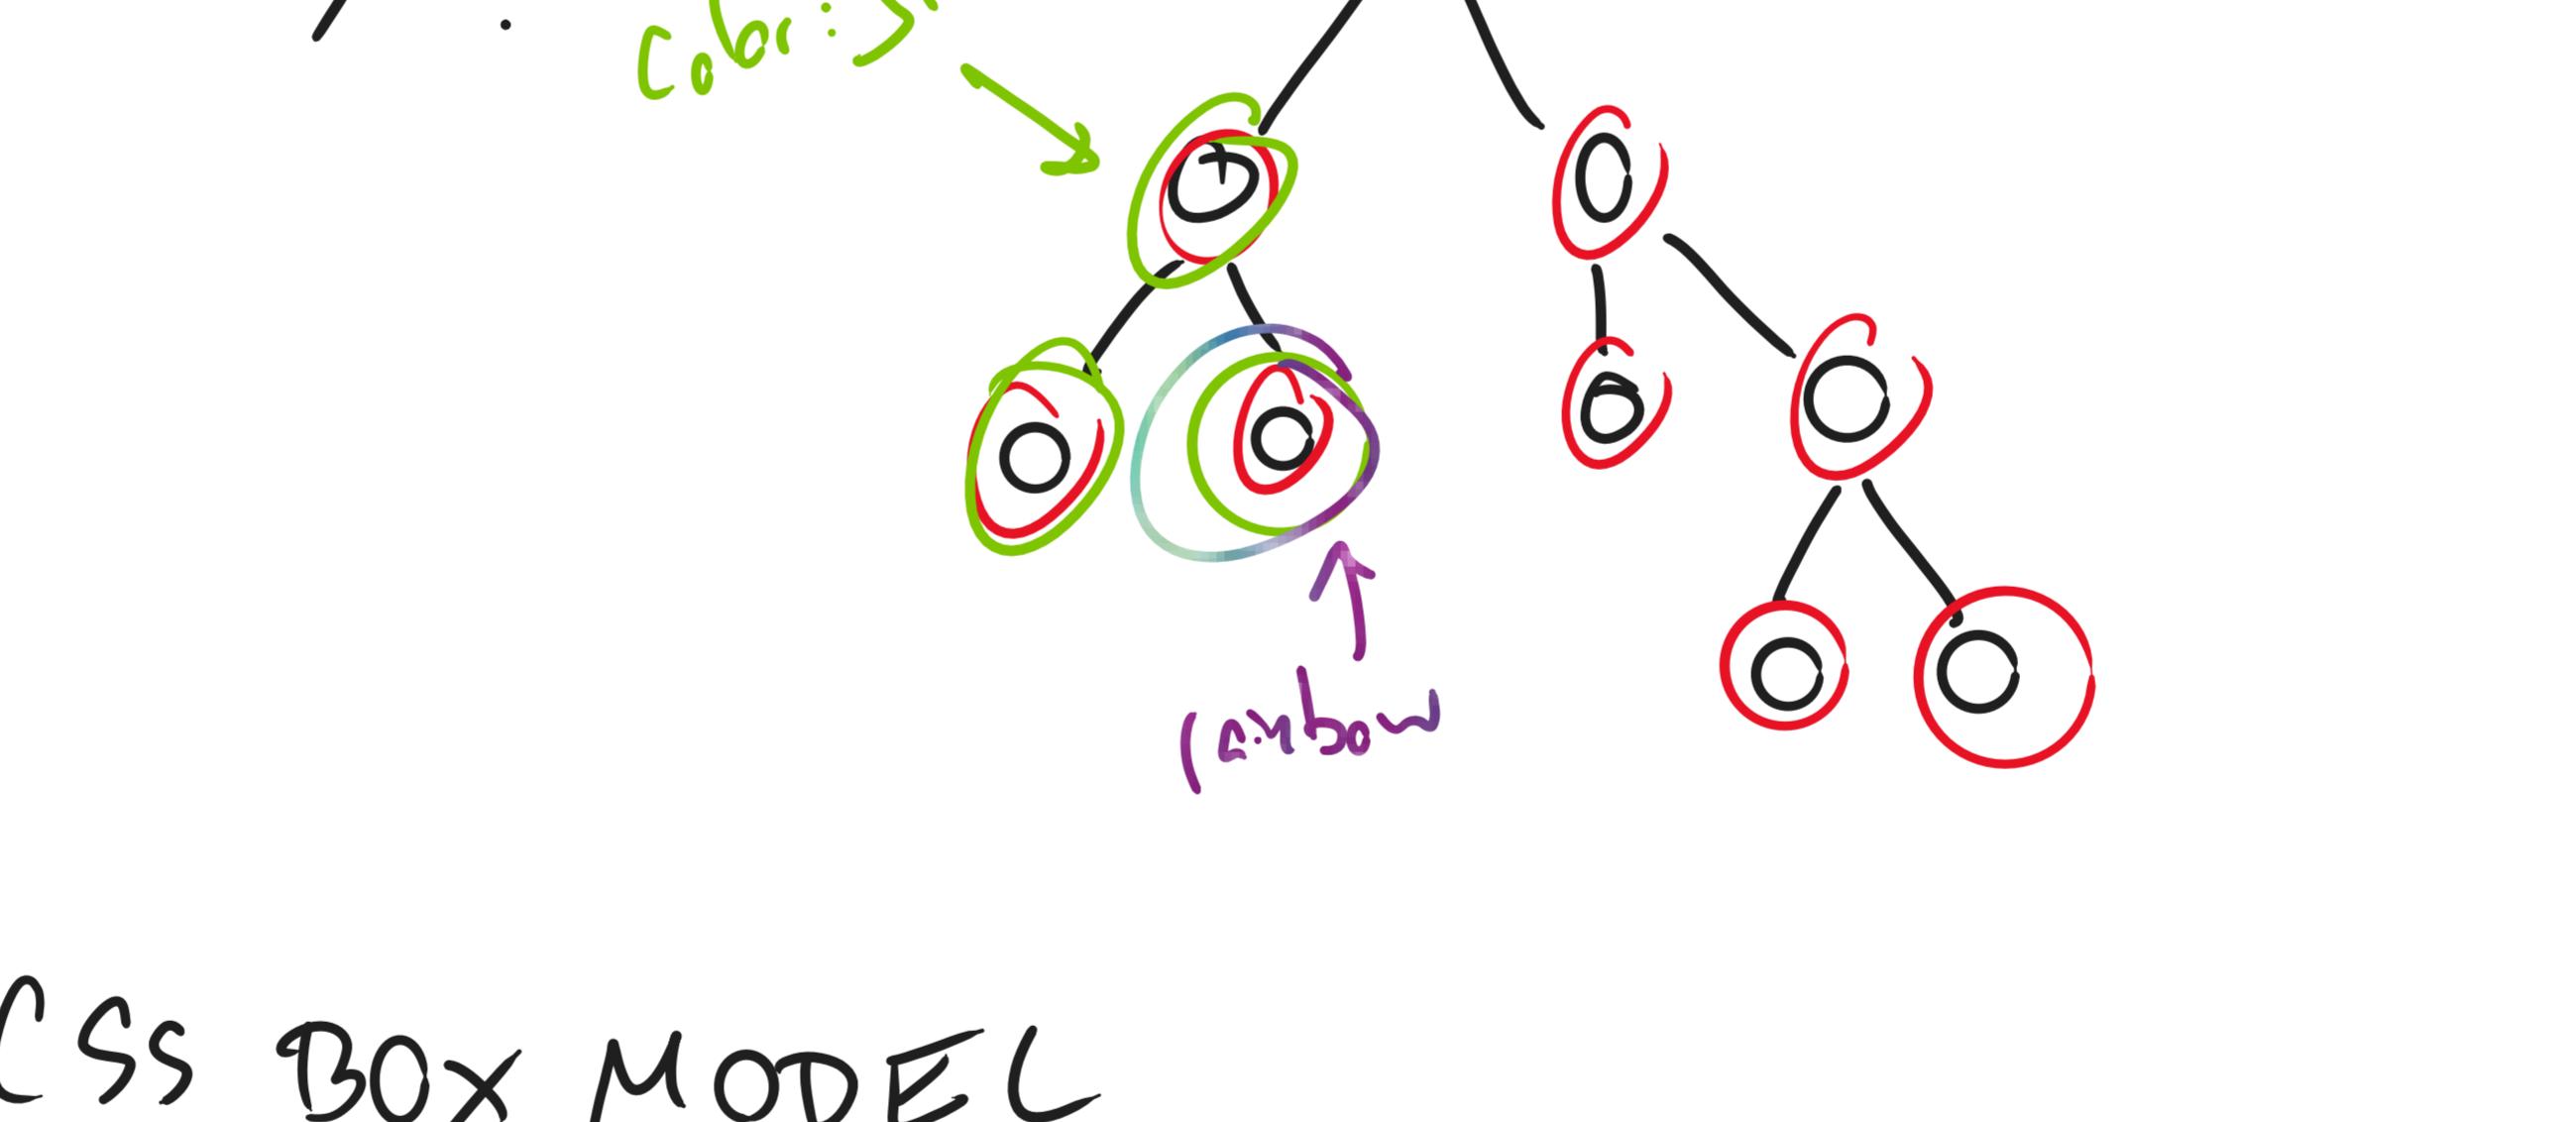

one of those is a "tag" / "element"

↳ it says "this content is this type of content"

CSS → Cascading Style Sheets → a set of rules for

↳ look/visual behavior styles

CSS BOX MODEL

↳ everything is thought of as a box

↳ even something like text is considered a box for display purposes
